

CONTENT CREATOR PACKAGE

Looking for candid footage of your big day? Our content creator package includes a dedicated content creator who will shoot the behind-the-scenes footage of your wedding. Content would be shot on iPhone with the unedited content within 24 hours and a selection of pre agreed edited videos sent over shortly following your big day.

Our Content Creator package covers everything from the ceremony, working alongside your photographer during your photos to the reception and through the evening. You can brief our content creator on key content you wish to be captured or simply allow them to capture the beautiful behind the scenes moments throughout your day.

By taking our content creator package, you allow Forgans to use the content across our social media platforms and website following a set time period after your wedding allowing you the opportunity to share this with your guests before it goes out on our pages.
